

## Policy for ASL sponsorship

1. Sponsorship of non-ASL conferences should be shown to benefit ASL and its membership via advancing freshwater science in Australia.
2. ASL funds will not be used to sponsor conferences held by other professional societies or by government agencies except where a joint conference is being held between ASL and another society/agency.
3. Sponsorship, where provided, should focus on assisting student participation at conferences, or assisting ASL members to attend conferences.
4. Individuals or groups seeking sponsorship must provide a written case to the ASL President, with approval for sponsorship requiring consensus from the ASL executive.
